2026 Global AI Summit: The Business of Intelligent Transformation

On April 7, 2026, **Bentley University** and **Future Talent Council** will bring together global policymakers, corporate visionaries and esteemed university leaders for an engaging dialogue on **how artificial intelligence, technology, and human capability are transforming business operations and driving organizational excellence across industries.**

Event Partner Invitation

Bentley University believes good business can impact more than just the bottom line – it can change the world. Bentley is focused on **impact, outcomes and success**. Our students are highly sought after; our faculty are applying innovative research to real-world problems; and our alumni are leading organizations around the world. We prepare the leaders of tomorrow to meet any challenge the global economy may bring.

Often referred to as “the World Economic Forum for talent”, FTC is a **global membership organization** of policymakers in labour and education, university leadership and senior corporate executives. FTC helps improve human capability and opportunity around the world by connecting leaders, providing and generating up-to-date, relevant insights and unfiltered advice.

Is this **your organization**? We are hereby inviting your organization to partner with us on this impactful event and mission

AI Summit: The Business of Intelligent Transformation

Bentley University | April 7, 2026

AI, Technology, and Human Capability

Exploring how people and machines collaborate to drive smarter decisions, creativity, and operational efficiency across every industry.

Ethics, Governance, and Responsible Innovation

Building frameworks for transparency, accountability, and trust in the age of intelligent systems, featuring insights from policy, business ethics, and global standard-setting leaders.

The Future of Enterprise Transformation

Real-world case studies showing how leading organizations are integrating AI for productivity, sustainability, and commercial growth from finance and real estate to healthcare and beyond.

Talent, Skills, and the AI-Enabled Workforce

New strategies for education, reskilling, and lifelong learning that ensure leaders and teams can thrive in AI-driven organizations.
